

Environmental Impact Assessment (EIA)

ITPEnergised is a trusted advisor providing client-focused, reliable, commercially minded, environmental and energy consulting services.

We deliver first-class environmental and technical support to our clients at all stages of the planning process and for a wide range of developments. We understand our clients' expectations, financial concerns and attitude to risk. Through the Screening, Scoping and EIA processes, we help to optimise the approach to achieving consent, with deliverable conditions and a buildable project.

We pride ourselves on providing the level of detail required to meet the needs of our clients in an accessible and technically robust manner. We have an excellent understanding of requirements for a range of consenting regimes (e.g. planning, Section 36, marine licensing, Nationally Significant Infrastructure Projects). Our industry-leading technical teams ensure we can navigate the most expedient path to a viable consented project.

“ITPE gives that extra entrepreneurial edge... working with the team over the last 6 years has given us a competitive advantage”

Fraser Campbell, Operations Director, Burcote Wind

We cover a range of sectors and types of development:

- Onshore and Offshore Renewable Energy
- Residential, Commercial and Urban Developments
- Industrial and Manufacturing Sites
