

Onshore Wind Portfolio

Client: Various confidential

Location: multiple locations

Installed Capacity: >100MW

We are providing asset management services for operational wind energy projects ranging from 500kW to 11MW.

The sites are across multiple diverse locations throughout the UK.

This involves managing the operation and maintenance of the assets, with monthly reporting and daily monitoring of output performance, as well as proactive recommendations for improvements.

Our Role:

- **Asset Management**

The work involves:

- Monitoring planning compliance
- Grid agreement management
- Budget and financial planning and management
- Monitoring and managing third party appointments
- Advising on Power Purchase Agreement Options
- Offtake management.

Outcome:

Successful handover and management for many years with contract renewals. Financial year profits better than plan across the whole portfolio.
