

Emissions Trading Scheme

ITPEnergised is a trusted advisor providing client-focused, reliable, commercially minded, environmental and energy consulting services.

Our highly experienced team of ETS experts has been providing support since the scheme was first introduced in 2005 and in that time we have been involved in the full range of issues, from new applications to permit surrender.

We provide a range of support specific to the needs of our clients, from standalone technical work, such as applications for free allowances under the New Entrants Reserve, to ongoing compliance support acting as part of the in-house ETS team which includes working with verifiers and Competent Authorities on the client's behalf.

We work closely with our clients to understand their strategic aims, operational challenges and opportunities in order to assist them in implementing bespoke support which manages their compliance responsibilities and corporate reputation.

Our clients have described our level of knowledge and expertise in the ETS as “such a great help” and that our “service from start to finish was worth its weight in gold.”

We cover a range of sectors and developments:

- Industrial and Manufacturing
- Onshore and Offshore Oil and Gas
- Food and Drinks Manufacturers
- Power generation
- Universities

We work with a range of clients, including:

- Ineos FPS
- William Grant & Sons Distillers
- University of Manchester
- NEO Energy
- Canadian Natural Resources International

Our services include:

- ETS Permit applications
- Ongoing Permit management or support
- Verification support
- Free allowance applications
- Emission forecasting
- Client representation with the Competent Authority
- Bespoke training

Our flexible approach means we are more than happy to tailor our range of services to suit the exact needs of the individual client or project .
