

P3M Project, Programme, Portfolio and Development Management

ITP Energised is a trusted advisor providing client-focused and informed professional advice and support. We have gained a wealth of relevant experience in the sectors we work in, both as consultants and clients; we understand your requirements.

Our P3M team can provide a whole project life wrapper from our in-house consultants, arranged across Services and Sectors. We manage and project time, cost and quality, and provide a single point of contact and coordinate the efforts to meet your specified objectives from first concept to decommissioning. We maintain project team continuity through the different phases and partner with your trusted supply chain, to give you the “best team for the race”.

We operate in many different sectors with a wide range of clients including UK & regional government, independent developers, utilities and funds. Our diverse clients cover onshore and offshore renewables, space, food and beverage, oil and gas, industrial, retail, residential, and public sector. All benefit from our knowledge of, and underpinned by our passion for, routes to net zero.

We can assist you with all phases of project delivery, whether it be a single project, a programme, or a portfolio. For those short on time or staff we can provide Development Management service where we sit at the decision table with you to translate Strategy to Operational success;

providing guidance and shaping the project to optimise success.

We work across a wide range of sectors:

- Offshore Wind—piled and floating
- Onshore Renewables including hydrogen
- Industrial / Manufacturing
- Oil & Gas
- Residential and Commercial

Our services include:

- **Project Management** We oversee the cost, programme, risk and governance for the project. We cover multiple phases of the project lifecycle; providing continuity and retention of knowledge, whilst considering all necessary technical disciplines.
- **Programme Management** Coordination and delivery of inter-related projects, such as Hybrid Renewable Energy Power Plant (HREPP).
- **Portfolio Management** providing the control (time, cost & quality) and governance for the assessment, screening and development of a pipeline of projects.
- **Development Management** defining the scope to meet your strategic vision, advising on best available technologies and delivery partners. As advisor and development partner we will coordinate, lead and deliver.
