

Carbon Services

ITPEnergised is a trusted advisor providing client-focused, reliable, commercially minded, environmental and energy consulting services

Our team has significant experience gained through working with small, medium and large organisations across many different sectors.

At ITP Energised, we take pride in our ability to deliver bespoke Carbon Services to meet our clients' needs wherever they are in their sustainability journey.

Our Approach:

To support our clients navigate the evolving sustainability landscape; we have developed a bespoke approach to carbon management, framed around the following four pillars:

1. **Quantify**
2. **Plan**
3. **Disclose**
4. **Take Action**

We work closely with our colleagues in the [ESG](#) and [Energy & Low Carbon Transition](#) teams and our clients describe our approach as, “refreshing”, “responsive”, “incredibly helpful”, and “beyond a consultant”.

Our Services:

Quantify

- Greenhouse gas emissions accounting
- Detailed scope 3 analysis & quantification
- Life Cycle analysis (LCA)
- Review & assurance

Plan

- Target setting
- Net zero/carbon neutrality road map strategy
- Sustainability Strategy

Disclose

- Carbon legislative compliance (e.g. Streamlined Energy & Carbon Reporting SECR)
- Climate disclosures (e.g. Task force on Climate Related Financial Disclosures TCFD)
- CDP submission support

Take Action

- Carbon Reduction Plan/Management Strategy
- Nature-based solutions
- Offsetting
