

Climate Change Agreement Management

ITPenergised is a trusted advisor providing client-focused, reliable, commercially minded, environmental and energy consulting services.

A Climate Change Agreement (CCA) is a voluntary agreement between an eligible organisation and the Environment Agency. The overall aim for CCAs is to reduce energy consumption and CO₂ emissions for energy intensive industries in the UK. CCAs are site specific so can apply to a single location within an organisation or across multiple locations within an organisation's portfolio.

The benefit for an organisation entering into a CCA is a discount applied to their Climate Change Levy (CCL), a tax included in energy bills. However, an organisation that has entered into a CCA has a target that has been set by its respective trade association, which has financial repercussions if it has not been achieved.

We have strong industrial and manufacturing credentials, along with considerable experience in successfully managing CCAs within a range of sectors.

We can provide a range of support specific to setting up a new CCA and/or their on-going management. This range of services has been has often provided some reduction in financial

pressures, especially in terms of unexpected buy-outs at the end of a target period.

We cover a range of industrial and manufacturing sectors:

- Titanium Production
- Aerospace
- Textiles
- Plastics
- Chemicals & Pharmaceutical
- Dairy
- Food & Drink
- Farming
- Surface Engineering
- Automotive

Our services include:

- Support applications for new agreements (when application window is open)
- Monthly target performance monitoring
- Keeping an up-to-date Evidence Pack
- Generating and submitting new PP10 & PP11 forms
- Monitoring energy invoices
- Annual returns to Trade Associations
- Communicating with HMRC, Environment Agency and Trade Associations
